

TOURISM: HOTEL NIGHTS

Arrivals of non-resident tourists in accommodation (hotel or similar establishments) is one of the standard measures of international tourism activity. It excludes domestic tourism.

Definition

This statistic refers to the number of non-residents who arrive in a hotel or similar establishment such as apartment-hotels, motels, roadside inns, beach hotels, residential clubs, boarding houses, and similar accommodation providing limited hotel services. Note that arrivals of non-resident tourists do not show the number of travellers. When a person visits the same country several times a year, each visit is counted as a separate arrival and if a person visits several countries during the course of a single trip, his/her arrival in each country is recorded as a separate arrival. Same day visitors and tourists who stay with friends or relatives are excluded.

Comparability

Several OECD countries cannot provide statistics on “arrivals of non-resident tourists in hotels or similar establishments”. For those countries, the statistical profile presents “arrivals of non-residents at national borders”. Canada, China, India, Ireland and the United States report the number of non-resident tourist arrivals at their national borders; a tourist is a visitor who intends to stay for at least one night. The figures for Japan, Korea and New Zealand include the number of non-resident visitor arrivals at their national borders; visitors include overnight (tourists) and same day visitors. For Australia (1990-97, 2007 visitors and 1998-2006 tourists) and South Africa (1990-94 visitors and 1995-2007 tourists) time series present mixed indicators.

Overview

According to *Tourism in OECD Countries 2008: Trends and Policies* (OECD, 2008), OECD member countries represent about 60% of international arrivals. Eight out of ten of the main tourism destinations in the world are OECD member countries. Tourism in OECD member countries accounts for between 2 and 12 per cent of GDP, between 3 and 11 per cent of employment, and on average about 30% of service exports. Tourism is also a key driver of globalisation. Its relevance to countries' economic, services industry and employment performance is widely recognised. Governments are also giving increased policy consideration to this industry at national, regional and local levels.

UNWTO's *Tourism 2020 Vision* forecasts that international arrivals will reach over 1.56 billion by the year 2020. East Asia and the Pacific, South Asia, the Middle East, and Africa are expected to record growth at rates of over 5% per year, compared with the world average of 4.1%. The more mature tourism regions, Europe and the Americas, are expected to show lower than average growth rates. Europe will maintain the highest share of world arrivals, although there will be a decline from 60% in 1995 to 46% in 2020.
